# NET-REBELS DARK WEB

# TOR BROWSER

Tor Browser è un browser web gratuito e open source basato su Mozilla Firefox, progettato per garantire la privacy e l'anonimato degli utenti su Internet.

Utilizza l'onion routing che è una tecnica di anonimizzazione delle comunicazioni in una rete di telecomunicazioni. In una rete onion, i messaggi sono incapsulati in "strati" di crittografia che vengono paragonati agli strati di una cipolla, dato l'incapsulamento. Il mittente rimane anonimo perché ciascun intermediario conosce solo la posizione del nodo immediatamente precedente e di quello immediatamente successivo.

# CARATTERISTICHE

- ANONIMATO E PRIVACY
- NAVIGAZIONE ONION
- PROTEZIONE DALLA SORVEGLIANZA DA PARTE DI GOVERNI E ALTRE ENTITÀ
- BLOCCO DEI TRACKER E DELLE PUBBLICITÀ (RIDUCE LA RACCOLTA DI INFORMAZIONI PERSONALI DEGLI UTENTI)

# SITI ONION

I siti onion sono siti web che esistono sulla dark web, una parte di Internet che non è accessibile attraverso i normali motori di ricerca o browser web convenzionali.

Sono spesso associati ad attività illegali, ma non tutti i siti onion sono illegali.

Si possono trovare siti come:

- **SITI ONION CHE COMMERCIANO INFORMAZIONI PERSONALI**
- **SITI ONION CHE DISTRIBUISCONO MALWARE**
- **SITI ONION CHE CONTROLLANO BOTNET**

## SITI ONION CHE COMMERCIANO INFORMAZIONI PERSONALI

In questi siti è possibile trovare ad esempio:

-  1 carte d'identità / passaporti
-  2 carte di credito
-  3 cartelle mediche

Questi sono tutti siti di mercati illegali per la fabbricazione di documentazione.

i documenti in questione variano da passaporti a carte di identità, passando anche dalla contraffazione di carte di credito.

I mercati variano da quello europeo a quello americano.

I prezzi sono ovviamente alti e richiedono pagamenti difficilmente tracciabili o irrintracciabili come l'uso della blockchain e quindi di cryptovalute.
